Zeus Fernandes

About Me

Results-driven **Data Analyst with 3+ years of experience** in data visualization, reporting, automation and business analytics. Currently pursuing a **Master's in Data & Business Analytics at Rennes School of Business**, **France** and completing an end-of-studies **Internship at Allianz Trade,** supporting credit reporting, data analysis, dashboard development and reporting automation.

WORK EXPERIENCE

Allianz Trade
Paris
Jul 2026 - Present

Data & Reporting Analyst Intern

- Support the Group Credit Reporting team in developing and maintaining internal reporting and dashboards, contributing to accurate and consistent KPI monitoring.
- Work with SQL, MicroStrategy and data visualization tools to prepare, analyze, and validate data for recurring and ad-hoc credit reporting, while gaining familiarity with internal databases and reporting tools across Credit Assessment, Credit Underwriting, and Claims & Collections.
- Collaborate with the DataHub team on the transition of reporting processes to the new IT environment, including Snowflake based data validation, report testing and troubleshooting.
- Automate Excel-based reporting processes using Python, reducing manual effort and improving the efficiency and timeliness of recurring reports.
- Support the production and validation of regular and ad-hoc credit reports while working with business and technical stakeholders in an international environment to ensure data quality, consistency and accessibility.

Elixir AI
Pune, India
Oct 2021 - Nov 2024

Data Analyst

- Automated large-scale data collection and reporting pipelines using Python, reducing manual effort by up to 10× and improving operational efficiency by 80%
- Designed and deployed interactive dashboards and analytical applications using Power BI, Tableau, and Streamlit to monitor KPIs and support business decision-making, contributing to 15–20% sales growth and managing code updates and version control through GitHub to ensure structured and traceable development.
- Extracted, transformed, and integrated multi-source datasets, collaborating with geospatial analytics teams to incorporate spatial performance metrics into dashboards across 75 store locations.
- Led the development of KPI monitoring systems to track operational performance at scale, resulting in a 10% reduction in loss/shrinkage through structured data analysis and validation.
- Delivered management-level analytical reports using SQL and Grafana, reducing manual reporting time by 60%, while improving data accuracy, accessibility, and cross-functional collaboration.

EDUCATION

Rennes School Of Business
2025 - 2026

Master's of Science in Data & Business Analytics

- Advanced training in data analytics, business intelligence, and data-driven decision making.
- Hands-on application of data science techniques to real-world business problems.
- Strong focus on translating data insights into strategic and operational decisions.

Don Bosco College of Engineering
2015 - 2019

Bachelors of Engineering in Electronics & Telecommunications

- Build a strong foundation in electronic systems, communication technologies and signal processing.
- Capstone Project: Developed a Smart Security System using TensorFlow and OpenCV for image-based detection.

CERTIFICATIONS

- Data Analytics (SQL, Power BI, Excel) – Codebasics (Sept–Oct 2024)
- Data Science Certification – ExcelR (Sept 2021)
- Business Analytics Master – Ineuron.ai (June 2021)
